Executive Engineer , IISER Pune

Scope and Conditions of work:

1. Analysis of pattern of induced voltage in neutral of UPS power source.
2. Location of noise generations in Biology wing in electrical distribution system.
3. Total harmonics and any surge in affected circuits in biology lab.
4. Suggestions for better earthing resistance value. (less than one ohms)
5. Visual inspection of equipment including subassemblies, wiring harness.
6. Inspection of power cables and related major components for its rating etc. and suggestion of it, if required.
7. Checking of voltage, current, harmonics and power factor etc. with help of fluke power analyser.
8. Thermography of all power equipment with data recording facility.
9. Earth testing of all related pits with highly calibrated contact free instrument.
10. Duration of audit should be not less than 10 (Ten) working days of daily 8 (Eight) hours to 24 hours, as required.
11. Minimum Two service engineer should be on site during whole activities. Qualification for both minimum Diploma / BE in Electrical Engineering and should have minimum Five year experience of Power Quality Audit. Required document for qualification, experience, designation etc. should be submitted by the agency with quotation.
12. Accommodation, Meal, Transport and Local transport should be arrange by the agency on their own cost. IISER Pune will not borne any charges or provide any facility to on site team.
13. No additional manpower, labour, tools and plant will be provided by IISER Pune. Labour and tools should be provided by the agency as required on site.
14. Rate and amount quoted by the agency should be mentioned with GST etc. including all charges.
15. Two nos contact details, email ids and address are required to be mention in quotation for further correspondence and communication during execution of work.
16. It is mandatory that agency should submit calibration certificate of all instruments with all details like make, model, Sr. No etc. Calibration certificate should be from NABL qualified calibration laboratory.
17. List of Equipment which is required during **Power Quality Audit** is as below :
 - a. Fluke VR 1710 Power quality recorder.
 - b. Fluke Power analyser 434+i3000sFlex
 - c. Thremogragh meter with recorder
 - d. Fluke event recorder
 - e. Non contact earth tester
 - f. Fluke clamp on meter
 - g. Dranetz BMIPower analyser.

All above instrument should have calibration certificate from NABL qualified calibration laboratory.

18. After Power audit of said wing, agency should submit their detailed report with its soft copies within Eight days to IISER Pune.
19. After Power quality audit, agency should submit detail solution for power quality issues like neutral voltage, surges etc which will be helpful for long term.
20. Solution submitted by agency should be feasible for execution. Required specification, details of equipment, distribution, list of vendors, price list should be submitted by the agency to IISER Pune within Eight days after completion of Audit.
21. During execution of work, team members of agency should be aware about importance of UPS power to Labs and it should not be interrupt at any circumstances.
22. Reports for Neutral to Earth voltage with various load patterns at minimum 12 locations of Biology wing should be submitted by the agency for before and after execution of isolation transformer work. Hence agency should have visit twice and submit their report twice for N-E voltage with load pattern. Date and time for before and after N-E voltage recording will be informed to the agency at least seven working days in advance.
