**PRE-BID CONFERENCE FOR PROCUREMENT OF INDUSTRIAL TYPE WASHING MACHINES**  
**TECHNICAL QUERIES AND CLARIFICATION**

TENDER NUMBER - IISER-PUR-0306-19

DATE : 30.7.19

S.No	Query/Clarification Sought	Clarification / Amendment
1	<p>Industrial equipment: As informed the current specifications also allow a semi commercial top loading equipment to bid for the tender. We request you to mention following specifications which are generic and would ensure that you really get efficient Industrial laundry equipment;</p> <p>Type: High Spin Soft Mount Front Loading            Programs: Minimum 4 modifiable wash programs            Number of washing cycles per 24 should be greater than 45            Should have Auto detergent dosig system            Gforce should be greater than 275            Drum quality AISI 304 Stainless or above</p>	<p>After carefully reviewing the specifications for the Industrial machines supplied by multiple companies, we decided to keep the specifications open so that we get maximum bids. We, however, have decided to increase the minimum number of cycles per 24 hours from 15 to 24.</p>
2	Query about card payment or coin payment	As discussed in the meeting, Card payment system is compulsory and coin payment is not acceptable.
3	It is confirmed washer should be without inbuilt water heater	Yes, inbuilt water heater is not required which is evident from the power requirement in the

		specifications
4	<p>Since Government of India is promoting made in India products and manufactures, I am sure IISER would also like to promote same. As per specification given in tender almost every bidder will have to bid for imported machine. On the same time prices for imported machines will be higher side. So we request that it will be convenient for you also if machine from 10-15 kg can be considered in tender.</p>	<p>We do promote made in India products, but our specifications are designed based on requirements we have. We are a residential academic institute where students live on-campus and do their laundry on weekly basis. And thus, the load requirements are 8-12 Kg, which has an overlap with what you are suggesting and thus specifications remain unchanged.</p>
5	<p>Right now, our models do not have the Card Reader &amp; Payment system. Would request you to please consider</p>	<p>Since students will be using the machines on their own, we need to have a card-based payment system that will help us getting payment per cycle used and also user will be traceable. In a coin-operating model, later part (traceability of user) is not possible.</p>
